

PRODUCT UPDATE 2008

Om beter in te spelen op de marktvraag, heeft VASCO het bestaand assortiment geoptimaliseerd. Het assortiment accessoires blijft ongewijzigd. In deze brochure ziet u een overzicht van het gewijzigde assortiment. **De gegevens in het rood worden geschrapt.** Om u en de consument nog beter van dienst te kunnen zijn hebben we ook ons voorraadprogramma geoptimaliseerd.

Voor de voorraadmaten in wit RAL 9016 bieden we maximale leverbetrouwbaarheid van 1 week. Alle voorraadmaten van de collectie CARRÉ en NIVA in de kleur M300, M301, M302, N502 en N503 zijn leverbaar in 3 weken. De overige maatwerk radiatoren zijn in principe leverbaar in 3 tot 6 weken, afhankelijk van het type radiator. Transportduur is niet inbegrepen in de levertijden.

NIVA

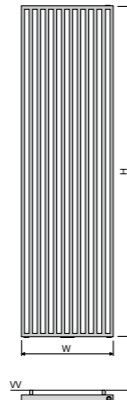

COLLECTION

Afin de renforcer notre position sur le marché, VASCO a optimisé la gamme existante. La gamme accessoires reste inchangée. Dans cette brochure vous trouvez un aperçu de nos assortiments modifiés. **Les données marquées en rouge seront supprimées.** Afin d'améliorer nos futures communications, nous avons aussi optimisé notre gamme de stock. Pour les radiateurs de stock en couleur blanc RAL 9016 nous offrons une fiabilité de livraison de 1 semaine. Tous les radiateurs de stock de la Collection CARRÉ et NIVA en couleur M300, M301, M302, N502 et N503 sont livrables en 3 semaines. Les autres radiateurs sur mesure sont en principe livrables en 3-6 semaines, dépendant du type du radiateur. La durée de transport n'est pas incluse dans le délai de livraison.

Für VASCO ist es wichtig die Heizkörpertypen bzgl. Baugrößen, Formen und Farben kontinuierlich dem eigentlichen Bedarf anzupassen. Aus diesem Grund haben wir einige Abmessungen aus dem Programm genommen. Die Vielfalt an Zubehör bleibt unverändert. In dieser Broschüre finden Sie einen Überblick zu den Änderungen. **Die in rot markierten Typen sind aus dem Programm genommen.** Um den Anforderungen der Kunden noch besser gerecht zu werden, haben wir auch die Lagerware optimiert. Für die lagermäßig geführten Heizkörper in der Farbe Weiss RAL 9016 bieten wir eine maximale Liefertreue von 1 Woche. Alle lagermäßig geführten Heizkörper der Kollektion CARRÉ und NIVA in der Farbe M300, M301, M302, N502 und N503 sind lieferbar innerhalb von 3 Wochen. Bei den maßgefertigten Heizkörpern ist VASCO die Qualität wichtiger als die Lieferzeit (3-6 Wochen). Die genannten Lieferzeiten verstehen sich ab Werk zuzüglich der Transportdauer.

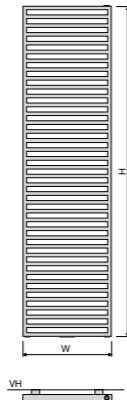

In order to meet the requirements of the market, VASCO has optimized the existing range. The range of accessories is not changed. In this flyer you can find an overview of the modified range. **The data mentioned in red are removed from the range.** In order to offer a better service to our clients we also have optimized our stock programme. For the stock radiators in white RAL 9016 we offer a maximum delivery reliability of 1 week. All stock radiators of the Collection CARRÉ and NIVA in the colour M300, M301, M302, N502 and N503 are available in 3 weeks. The other custom made radiators are in principle available in 3-6 weeks, dependent on the type of radiator. The transport duration is not included in the delivery terms.
